

Amadeus, In Memoriam September 2009

Thank you to all who were so generous in sending donations to help our precious Amadeus. His tired, little body just could not hold out any longer. And with great sadness, his foster mom helped him to the Rainbow Bridge this last month. Please know that your generosity was not wasted. SCMR was able to provide Amadeus with quality veterinary care until it was necessary to let him rest. You made a very **BIG** difference in his life!

We will miss you, Amadeus.

CALLING ALL "ANGELS" SPECIAL EDITION

A Special Needs Plea!

Help Needed for Bilow's Surgery

If Bilow had not been rescued from the puppy mill in which she was imprisoned, she would have surely died! Extensive surgery was needed to remove massive mammary tumors, the largest measuring half the size of a man's fist. Over 50 staples march across the full length of Bilow's underside!

Poor Bilow also required two fistula repairs, treatment of ear and eye infections and removal of cancerous cervical tissue during her spay procedure. Plus she lost all of her teeth.

The good news is she is doing well and is very loving! Despite her life of isolation and deprivation, this girl only wants someone to love. Naturally, her surgical expenses are quite steep. Please open your hearts to Bilow and send a **tax deductible** donation to be one of her "Angels" today. You can send in a check and mark it for Bilow or go to our web site, www.scmradoption.com, and donate via PayPal.

Dogs are Coming out of the WoodWork!

Zuma

Look at that beautiful face! It hides years of suffering! Zuma has difficulty walking a straight line...she spins due to years confined to a small cage. She has an odd gait...very small, high steps with her back legs because her hind muscles were unable to stretch. It's going to take some time to teach Zuma she can run free. Zuma also lost 26 teeth, some so loose they just fell out when touched. Mammary tumors were removed, and eye and ear infections were treated. Your **tax deductible** donations are needed to continue Zuma's recovery. It's going to be a special joy to watch her discover what living free is all about!

Missy is a shy little doll...not unusual after years of neglect in a puppy mill. She arrived at SCMR with a broken jaw that had not only gone untreated but also unnoticed! No wonder she was afraid of anyone touching her! Missy's vetting is ongoing at the present so SCMR needs help with her expenses. She will receive a dental as soon as her jaw can be unwired. Needless to say, these are expensive procedures. But Missy deserves a chance at a happy life. Wouldn't you like to be Missy's Angel? Please make a **tax deductible** donation via PayPal or mail.

Missy

Niccolo

Who wouldn't love to add this little two year old charmer to their household?! Niccolo may be part Yorkie or Poodle due to his unusual coloring. The trend in puppy mills is "Designer Dogs", a blend of different breeds. Although Niccolo came from a puppy mill, he loves everyone and is good with his foster siblings. He was more fortunate than most since he does not have any broken bones or serious health issues. Plus, he was only there for two years unlike so many who are emotionally scarred from years in a cage.
